## New Product Brochure describing Teledyne Leeman Labs line of mercury analyzers - the Hydra Series

Hudson, NH - Teledyne Leeman Labs, a leading manufacturer of analytical instrumentation for elemental analysis, announces the release of a new product brochure describing its line of mercury analyzers - the Hydra Series.

When the concentration of mercury needs to be accurately measured, laboratories all over the world turn to Teledyne Leeman Labs for high performance solutions to their mercury analysis challenges. Now in their third generation, the Hydra Series of products cover a broad range of techniques including cold vapor atomic absorption (CVAA), cold vapor atomic fluorescence (CVAF) and automated sample preparation. All of our mercury products have been designed to comply with U.S. EPA and European methods for the determination of mercury in a broad range of sample matrices.

To receive a copy of this latest brochure on the Hydra Series of Mercury Analyzers, contact Teledyne Leeman Labs, 6 Wentworth Drive, Hudson, NH 03051. Telephone (603) 886-8400, Fax: (603) 886-9141 or email: [LeemanLabsinfo@Teledyne.com](mailto:LeemanLabsinfo@Teledyne.com).
