DECEMBER 2005

NEW ICP SOFTWARE DEMONSTRATION CD

Hudson, NH - Teledyne Leeman Labs introduces the latest demonstration CD for its High Dispersion ICP, The Prodigy. This new demonstration CD allows you to navigate through running a Prodigy ICP. If you are in the market for an ICP, this helpful CD lets you “test drive” the Prodigy ICP.

Prodigy’s Window-based software provides intuitive navigation between applications, network readiness, access security and regulatory compliance tools. It is based on familiar navigator conventions commonly employed on the internet with a simple tree structure and application tabs for associated functions.

Prodigy automates all aspects of instrument operation including all plasma parameters, all sample introduction parameters, all QC controls and all system diagnostics (including remote service access).

To receive a copy of the Prodigy ICP Demonstration CD call 1-603-886-8400 or email:
LeemanLabsinfo@teledyne.com.

For more information, please contact Robin Tamulynas, Teledyne Leeman Labs, 6 Wentworth Drive, Hudson, NH 03051, Tel: 603-521-3288, Fax: 603-886-9141 or email:
