

April 8, 2009

Dear Valued Customer:

Subject: Certification of ARRA Buy American Provision.

As you are aware, the American Recovery and Reinvestment Act (ARRA) of 2009 was recently passed by Congress and signed into law by the President. Section 1605 of ARRA contains a “Buy American” provision which prohibits the use of ARRA funds for a project “unless all ... manufactured goods used in the project are manufactured in the United States”.

As of this date, the White House Office of Management and Budget has not issued an Interim Rule clarifying the Buy American provisions contained in the ARRA. However, I want to inform you that the manufactured goods that we supply to our markets are produced at our factory here in Hudson, New Hampshire, our sole manufacturing site. Therefore, to the best of our knowledge and belief, the manufactured goods to be supplied to your project are in compliance with Section 1605 of the ARRA.

Please feel free to contact me if you have any questions in this matter or if we can be of any further assistance.

Sincerely,

Peter G. Brown, Ph.D  
Vice President and General Manager  
Teledyne Leeman Labs
